Progress of New South Wales, 1860-1890—Appendix.

PREFACE.

THE seven parts which this volume comprises have already been issued separately, and now appear in a collective form with a General Index. Since the publication of the various parts the information contained in them has been subjected to careful revision, and in some few cases the tables have been entirely recast. It is possible, however, that some errors may still remain uncorrected; if there be any such which come under attention information concerning their nature and position would be gladly received.

The following pages contain statistics only, and should therefore be read in conjunction with the "Wealth and Progress of New South Wales," an annual publication, based for the most part on the figures contained in this volume, and designed, as its title shows, to illustrate the resources of this Colony.

NOTE.—In many instances the amounts lent upon mortgage by the banks are not stated, but simply the words "valuable consideration" or "cash credit" inserted in the deed. As this occurs frequently when the properties mortgaged are evidently of great value, the absence of the amounts must materially affect the returns, and, as a consequence, the amounts under the head of "reconveyances" are necessarily incomplete. In some cases a similar omission occurs in the stock mortgages, but not to the same extent as in those under the head of Real Property.

NOTE.—The total number of prisoners under sentence received into the various gaols does not agree with the total sentenced as given in table No. 47. This is accounted for by the fact that many prisoners are transferred from one gaol to another, notably in the cases of Berrima and Trial Bay, where most of the prisoners received were transferred from other gaols.

NOTE.—The Public Examinations are similar to the *Middle Class* Examinations of Oxford and Cambridge. They are held annually, in September, and are intended to test the qualifications of boys and girls attending schools or being instructed privately. They are divided into Senior and Junior, and certificates of competency in the *several* subjects of examination are given to the successful candidates. These examinations are *distinct* from the examination for the Civil Service.

* The Matriculated Students are included in those attending lectures in first columns.

Note.—The returns from which this table is compiled were obtained from clergymen and other church authorities. The figures for 1886 denote the number usually attending principal service, not the average attendance, for this reason the figures for the year named cannot be used for purposes of comparison with those of the other years given above. Sunday-school children are not included; for these figures see table 45. * So returned by the officers of the Salvation Army.

As it is of first importance to accurately classify the hands into their respective employments, it has been customary to subdivide works where more than one important industry is followed. Thus where boot-making and tanning are carried on in the same establishment, if both industries are large, they would be treated as separate works, so with engineering and joinery, brewing and cordial-making, &c.

*In addition to this area, which represents the land alienated in fee simple under various forms of sale, there were 3,121,077 acres granted for public and other purposes since the foundation of the Colony. The total amount exceeds the figures given in the preceding table by 15,515 acres, and the excess is most likely distributed over several counties. The correct area alienated in each county will not be available till the revision of all the counties is effected.

* The Conditional Leases granted under Sec. 54 of Act of 1884 are *new* leases applied for, and not leases held under the repealed Acts and converted.

† The number and area of Conditional Leases gazetted in this year were in excess of those taken up and forfeited or disallowed by 143 and 89,459 acres respectively.

‡ The figures given for Conditional Leases disallowed, and not yet dealt with, refer to applications made under the Act of 1889 only.

§ There were also 2,661 Conditional Leases, comprising an area of 1,625,520 acres, taken up under the Act of 1889 during 1890; these totals, together with the figures above quoted, as taken up under the 1884 Act, give a total of 15,891 Conditional Leases, with an area of 9,903,949 acres—some of these, of course, may be disallowed.

* The City of Sydney was first incorporated in 1842, and the mayoralty continued to the end of 1853 ; the Corporation was then dissolved, and the Government took over the Municipal functions and appointed three "City Commissioners," who administered the affairs till the end of the year 1857, when the old regime was re-established.

** For Municipal purposes, the annual value of unimproved land is taken at 5 per cent. of the capital value shown in this column.

† The amounts shown in this column represent the total value of *all ratable* property in the Municipalities, including unimproved lands, buildings and cultivated lands.

‡ The Borough of North Sydney is formed by the union of the Boroughs of St. Leonards, East St. Leonards, and Victoria.

§ Rates have not been struck for the year 1890.

‖ Within this Municipality are mines, the capital value of which is estimated at £13,000,000, that under the terms of the Municipal Act are not liable to taxation.
